

## PROJECT PROFILES

*Sarasota Police Headquarters, Sarasota, FL*

*South Miami Hospital,  
Miami FL*

*University of Florida/  
Florida Atlantic University  
Bio Med Building*

## SETTING THE EXAMPLE

Business as usual building practices pumps billions of tons of emissions into the atmosphere and costs Americans nearly \$400 billion every year. Cladding Systems is committed to sustainable design which provides economic, human and community benefits as well as reduced environmental impacts.

- Energy Star/Efficiency rated products
- Metal materials are 90% recycled
- Various products are 100% recyclable
- 'Cool' roof reflective applications
- Highly compatible with solar panels/film
- Integrated building designs produce optimal energy efficiency
- Lean approach which reduces waste
- LEED compliance
- Significantly reduces fossil fuel usage
- Provide needed U.S. jobs in an underrepresented area
